

AGM PICTORIAL

Guest speaker, Dr. Raymond Wright, making a point about Ocean Thermal Energy Conversion (OTEC).

The President, Parris Lyew-Ayee, describing the design of the proposed obelisk. He also warned about one possible danger of having such a monument about the place --- which led to the following response from a large section of the audience

"There's nothing to worry about - there are no virgins on campus!" (If you were not there at the AGM, you will never know what this was all about!)
